AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Page 11, second full paragraph, please amend as follows:

The two retaining portions 61 are formed on the inner surface of each of the braid press-fastening portions 51, and are arranged in a longitudinal direction of the connection piece 55.

The ~~retain~~-retaining portions 61 on one braid press-fastening portion 51 are arranged in opposite to the corresponding retaining portions 61 on the other braid press-fastening portion 51 in the press-fastening operation in axial cross sections of the terminal 31 as shown in Fig. 4.
